## **DETAILED ACTION**

## Election/Restriction

- During a telephone conversation with Susanne Hopkins on 28 July 1998 a provisional election was made with out traverse to prosecute the invention of "A Process of cleaning Bone Grafts, claims 1-80. Affirmation of this election must be made by applicant in replying to this Office action. Claims 81-84 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. However, after further reviewing the claims a different grouping has been established by the examiner. No oral election was selected by Susanne Hopkins on 28 July 1998 regarding the following: Claims 1-64, and 67-69 are the invention of "A process of Cleaning Bone Grafts". Claims 65, 66, and 70-80 are drawn to "a bone graft", and claims 81-84 are drawn to "a holding device".
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-64, 67-69 are drawn to "the process of cleaning bone grafts", classified in class 128, subclass 898.

Serial Number: 08/871,601 Page 3

Art Unit: 3738

II. Claims 65, 66, and 70-80 are drawn to "a bone graft", classified in class 623, subclass 16.

- II. Claims 81-84 are drawn to "a holding device", classified in class 269, subclass 86.
- Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as scrubbing or shaking bone grafts with an antiviral, antifungal and antibacterial solution.
- 4. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as soaking, agitation and pulsatile water flow for cleaning. The holding device may also be used to store centrifugal tubes for the process of separating liquid compounds.

. .

Serial Number: 08/871,601

Art Unit: 3738

Page 4

- 5. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as storing centrifugal tube for the process of separating chemical compounds. See MPEP § 806.05(d).
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and the searches required for the three inventions are divergent, restriction for examination purposes as indicated is proper.
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
